

STANDARD OPERATING PROCEDURE

High Equity Lead Revival

Text Revival Campaign · Twin Home Buyer & Equity Track Inc.

WHAT THIS TOOL DOES

It works your leads for you. For every lead it opens the contact in **REI BlackBook**, checks that it's **safe and allowed to text**, and — only if it passes every rule — sends the correct **approved text message** and records the result on the dashboard.

You watch it happen live, and at the end you save a clean report. You never type a message or pick who to text — the tool follows the rules on every single lead, the same way, every time.

How it works — the journey of one lead

This is what the tool quietly does to *every single lead*, one after another.

1

Finds the lead in REI

It searches REI BlackBook by address, name, or phone and opens that contact.

2

Checks it's allowed to text

Is the property in California? Was it already texted this month? Is the contact opted out or tagged “do not text,” sold, listed, wrong number? If any of these, it **skips** — no text.

3

Picks the right message

It reads whether the lead belongs to **EQT** or **THB** and chooses that company's approved message — never the wrong one.

4

Sends the text & confirms it

It types and sends the approved text, then confirms it actually went out before marking it “Text Sent.”

5

Records the result

The outcome shows on the dashboard and is saved, so you get an accurate report and no one is ever texted twice.

The big idea

You just load the leads and press Start. The tool does the searching, the safety checks, the correct message, and the record-keeping — for hundreds of leads — exactly the same way every time.

1 Download & install the app

One-time setup. Do this once per computer.

Download the installer from Google Drive:

↓ **Download Revival AI (Google Drive)**

1

Open the Drive link

Click the button above (or paste the link into your browser), then click **Download** in the top-right of the Drive page.

2

Run the installer

Open the downloaded **Revival AI Setup.exe**. If Windows shows a blue “Windows protected your PC” box, click **More info → Run anyway** (it's safe — it's just not from the Microsoft store).

3

Finish & open

Let it install. You'll get a **Revival AI** icon on your desktop. Double-click it to open the tool.

Each person installs their own copy

Colleagues on different computers or WiFi can all install it from the same Drive link. It still all runs through the one REI account, so nothing conflicts and no lead is texted twice.

2 Opening the tool & first-time login

Two ways to open it — both look and work exactly the same.

EVERYDAY WAY

The App

Double-click the **Revival AI** icon on your desktop. A window opens with the dashboard. This is what colleagues install and use.

MAIN COMPUTER

The Website

On the main computer you can also open it in a browser at

`http://localhost:3000` while the program is running.

First time only — log in to REI

When you first run it, a browser window opens on REI BlackBook. **Log in there once by hand.** The tool remembers it, so you won't have to log in again next time.

3 Get your leads in

Pick ONE of these to load the leads you want to work.

Upload a spreadsheet

Click **Choose File** and pick your CSV or Excel file. It reads your columns automatically and keeps them all.

↓ Pull all from REI

Click ↓ **Pull all from REI** to bring in every contact straight from REI — no file needed.

Already worked this month? It's remembered.

Leads you already worked this month show up with their result already filled in and are **skipped**, not redone. Only **new** leads get worked. It all resets on its own at the start of each month.

4 Run the automation

Set it up once, press Start, and let it go.

1

Turn ON Live Sending

Click  **Live Sending: OFF** so it turns  **Live Sending: ON**. OFF = safe practice mode (checks everything but sends nothing). ON = real texts go out.

2

Set the batch size & Auto-continue

Set **Texts per run** to **100** and leave **Auto-continue** checked. It sends 100, pauses a moment, then automatically keeps going — 100 at a time.

3

Press Start

Click ► **Start Live Automation**. It works down the list on its own and keeps going batch after batch until every lead is done — or until you press Stop.

4

Watch it live

The cards at the top and the table fill in as it works. Green links open the contact in REI or the property on Redfin for a quick check.

5

Stop whenever you want

Click ■ **Stop** to end your shift. Progress is saved — next time you press Start it picks up the unfinished leads and skips everything already done.

5 What the results mean

Click any card at the top to show only those leads in the table.

Text Sent

The approved text was **confirmed sent** to a clean, eligible lead.

Sold / Listed

The property is **sold or listed** — not texted.

Not Int. / Opt Out

The lead said **not interested** or **opted out** — not texted.

To Delete / Bad

Wrong number, failed number, bad lead, or **not found** in REI.

Out of State

Property is **outside California** — never texted. (REI link still shown.)

Why some leads seem to “disappear”

A few leads the tool can't confirm cleanly (for example, it couldn't tell EQT from THB) are quietly **held and re-checked automatically** on the next run. Nothing was texted — they just try again later. That's why they aren't shown as their own category.

6 The safety rules (automatic)

These are always on — you don't have to do anything.

- **California only.** Anything outside CA is skipped as Out of State.
- **Never twice in one month.** A lead already texted this month is skipped.
- **Right company, every time.** It reads whether the lead is **EQT** or **THB** in REI and sends that company's message — never the wrong one. If it can't tell, it holds the lead instead of guessing.
- **Respects opt-outs & bad tags.** If REI shows the lead is opted out or shouldn't be texted, it won't send.
- **Only marks “Text Sent” when it really sent.** If a send can't be confirmed, it's held for another try — never falsely marked.

THE TWO APPROVED MESSAGES (LOCKED)

Twin Home Buyer: “Hi, this is Juan with Twin Home Buyer. You contacted us before about selling your home. Are you still interested? Reply YES or NO. Thanks!”

Equity Track Inc.: “Hi, this is Juan with Equity Track Inc. You contacted us before about selling your home. Are you still interested? Reply YES or NO. Thanks!”

7 The daily report

At the end of your shift, capture the numbers.

Click  **Daily Report.** It opens right inside the tool and shows:

- **Today** — only what was worked today (your shift's numbers), with a plain-English summary line.
- **This Month so far** — the running total for the whole month.

Use  **Save Today** or  **Save This Month** to download a clean one-page **PDF** — it saves straight to your Downloads, no printer needed.

Quick fixes

- **A login page appears.** Just log in once in that window — it's remembered afterward.
- **Nothing sends.** Check that **Live Sending is ON** (green). OFF is safe practice mode.
- **The browser closed by itself.** The tool reopens it and keeps going on its own.
- **A lead shows “Text Sent” but you're unsure.** Click  **Re-verify Sent** — it checks REI and fixes any that didn't truly send.
- **Want to re-check errored leads.** Just press ► **Start** again — it re-works anything unfinished and skips what's done.

Working with colleagues

Everyone can have their own copy installed, even on different WiFi. Because the “already texted this month” rule and REI's own history are shared through the one REI account, **no lead ever gets texted twice**, even if two people run it at the same time.

High Equity Lead Revival · Operating Guide · Keep the window open while it runs.
